

Capture the Benefits of eSignatures.

TOPAZ

Electronic signature capture pads, patented software tools and applications, and forensic authentication capability for any eCommerce environment.

Better Signatures.

Topaz offers the highest-quality and widest variety of electronic signature capture tablets available.

Interactive LCD pads for displaying text, graphics, and pen-tap checkboxes

Integrated electronic signature and fingerprint capture

Large- or small-size simultaneous ink-on-paper signature capture

A Myriad of Options

With more than 15 different models to choose from, Topaz brings the right product to your application environment. Signature pad products include passive pressure touchpads, rugged signing surfaces with electronic pens, interactive LCD displays included full-color VGA display, integrated fingerprint sensors, wireless capability, full-size inking clipboards, small-footprint and desktop units.

Bundled Software Solution

Topaz pads include a license to use our powerful software tools, applications, and plug-ins for a complete, integrated signature solution. All support and updates are free, meaning you'll never need to subscribe to yearly or per-unit licenses or support services to keep your eSignature system up and running.

High-Quality Capture

Topaz technology captures signatures as a series of high-resolution events. From this event data, images can be generated for display purposes or forensic experts can conduct authenticity analysis.

Better Software.

Custom Development Tools

Topaz offers SigPlus tools for ActiveX, native .NET, Java, C++, Linux and Unix so you can take your eSignature solution to any platform or operating environment, or switch between them as your needs evolve, without having to purchase additional software or licenses. For users desiring Topaz forensic-quality signatures on a Tablet PC platform without additional hardware, we offer SigPlus TabletPC software to capture signatures using the PC's own pen. All updates and support are provided at no charge, along with source code examples for all major development environments.

Microsoft and Adobe Plug-ins

SigPlus allows you to sign common third-party documents with MS Office and Adobe Acrobat plug-ins. This free software enables users to create, view, and validate signatures in Word, Excel, and PDF documents easily with a simple click of a toolbar icon.

Document and Signature Integrity

Aside from the cost and compatibility benefits of bundled SigPlus tools, applications, and plug-ins, Topaz software captures the highest-quality and most forensically-robust electronic signatures and binds them to electronic documents. Patented integrity and security checks can detect and prevent fraud before it happens. Topaz tools provide eSignature capability that exceeds the state, national, and global eSignature laws.

Topaz signature software solutions:

SigPlus™ drivers/development tools:

ActiveX
.NET
Java/ J2Me
C++
Unix/Linux
Tablet PC

Other tools:

SigValid signature validation
SigSmart XML code
SigID fingerprint capture and scoring

Plug-ins:

MS Word and Excel
Adobe Acrobat and Approval

Applications and Utilities:

SigTool Imager:
create signature graphics files
SigCompare:
quick signature authentication
SigAnalyze:
forensic signature examination

The global leader in eSignature solutions.

Secure eDocuments

Topaz Gem-series and SigLite electronic signature provide high-quality signature capture capability for a multitude of applications and operating environments. Topaz eSign pads and software keep signatures secure through dedicated, versatile interface and patented signature techniques which ensure integrity.

Bundled Software Tools

A license to use Topaz’s powerful eSignature software tools, applications, and plug-ins is included with the purchase of a tablet at no additional charge, making Topaz a great eSignature value. Instead of needing to buy separate development tools, 3rd-party application plug-ins, and verification utilities, Topaz provides all the software tools and updates you’ll ever need at no charge.

Forensic Authentication

Topaz offers the first forensically authenticating electronic signature system by virtue of the .SIG proprietary data format and SigAnalyze software, giving our customers the peace of mind that comes from knowing their eTransactions are enforceable in a court of law.
